DQ09	Consistency	dim_customer	Region does not match the country	4	98.77%
Total				**108**	**99.98%**

Failed rows by rule

DQ Failed Rows by rule_id

How the clean bi views handle each issue

DQ01 duplicate customers: mapped to one golden record (bi.customer_master_map).
DQ02 and DQ09 country spelling and region: standardised from reference tables; region is derived from the country.
DQ03 missing account tier: shown as Unassigned.
DQ04 and DQ05 orphan products and quantity of 0 or less: lines excluded from fact_sales.
DQ06 duplicate tickets: one copy kept (ROW_NUMBER).
DQ07 closed before opened: repair time left blank so MTTR is not distorted.
DQ08 impossible telemetry: excluded from OEE.
